Key Funnel Insights & Recommendations

- 1. **11.70% conversion rate** — 88.30% of campaign effort wasted on non-converters. Fix targeting.
- 2. **Engagement predicts conversion** — Only 33.25% engaged meaningfully. Quality over quantity.
- 3. **Retired and student segments** convert highest. Reallocate budget toward these segments.
- 4. **Peak months: Mar, Sep, Oct, Dec.** Increase spend here. Reduce in Jan and May.
- 5. **Previous success predicts future conversion.** Build priority re-contact list first.
- 6. **Longer calls convert more.** Train agents on engagement. Avg duration 258 seconds overall.

Customer Segment Insights & Recommendations

- 1. Age Matters Significantly:** Customers aged 60+ and 18-25 convert at higher rates than middle-aged customers. Middle-aged customers (36-55) are likely more financially committed elsewhere. Recommendation: Prioritize young and senior customer segments in targeting.
- 2. Education Drives Conversion:** Customers with tertiary education show higher conversion rates. More educated customers better understand investment products. Recommendation: Tailor campaign messaging for educated segments with detailed product information.
- 3. Single Customers Convert Better:** Single customers show higher conversion rates than married ones. Married customers likely have joint financial decisions and more complexity. Recommendation: Design specific messaging for single customers emphasizing independence and financial growth.
- 4. High Balance Customers are Prime Targets:** Customers with higher account balances convert at significantly higher rates. They have disposable income and are more receptive to investment products. Recommendation: Segment high-balance customers and give them priority in campaign outreach.
- 5. Cellular Contact Outperforms Telephone:** Customers contacted via cellular convert at higher rates than those contacted via telephone. Recommendation: Shift campaign contact strategy toward cellular outreach and reduce landline calls.
